

Ravi Mukesh Rameschandra

AI Transformation | Product Ownership | Enterprise Architecture

ravimr@hotmail.com · linkedin.com/in/ravi-mr · Antwerp, BE

PROFESSIONAL SUMMARY

Product Owner and transformation professional with 4+ years of experience delivering digital initiatives across consulting and corporate environments, including leading €1.6M+ in enterprise product rollouts. Passionate about AI transformation, with hands-on experience prototyping workflows (Copilot Studio, Power Platform) and researching the security, data foundations, and governance frameworks required to scale enterprise AI responsibly.

PROFESSIONAL EXPERIENCE

DEME Group | Business Analyst & Product Owner | PMO Antwerp, BE · Jan 2024 – Present

- ▶ Conducted a feasibility study on secure AI developer tooling (Aider/Cline), designing a tiered security architecture (Azure OpenAI + Private Link) and projecting €600K in annual productivity recovery.
- ▶ Developed an enterprise AI adoption framework mapping a three-tier architecture (shared foundations, business capabilities, and use cases) to enable secure, compliant, and scalable AI development.
- ▶ Architected an automated presentation generator in Copilot Studio, implementing a custom 'Sandwich Pattern' to isolate static templates from dynamic LLM outputs and optimize token efficiency.
- ▶ Lead end-to-end product ownership of a company-wide €1M site reporting platform, managing requirements, backlog prioritization, and cross-functional Agile delivery.
- ▶ Own the digitalization of invoicing and cashflow forecasting across a €600K program, saving 3 hours per project per quarter across 100+ active client projects.
- ▶ Led implementation of a Dynamics 365 contract change module used across 60 projects, streamlining governance and visibility over €1bn in potential variations.

Deloitte Consulting | Business Consultant Lisbon, PT · Sep 2021 – Jan 2024

Delivered transformation and technology consulting engagements across multiple industries.

- ▶ Mapped contractual requirements for a national gas utility and designed an optimized scheduling workflow, reducing schedule generation time by 15x.
- ▶ Mapped data transformation processes and defined technical requirements for a high-growth startup, enabling the launch of four new product lines.
- ▶ Supported the definition of a 3-year tech and workplace roadmap for a European dairy company, gaining C-level buy-in and aligning mid-to-long term operations.
